Advice from professionals is great

Architecture internships are a great way to get your head out of the books and learn how to build, create, manage, or engineer a construction project in the office and on site. In parallel to your networking you need to be extensively researching the firms you want to work for. Get to know everyone in the Architecture community and allied fields (all ages and experience levels).

Professional Associations

American Architectural Foundation (AAF)

The American Institute of Architects (AIA)

Association of Collegiate Schools of Architecture (ACSA)

American Society of Landscape Architects

The Applied Technology Council (ATC)

The Architectural Research Centers Consortium, Inc. (ARCC)

Professionals in the practice of Architecture are responsible for planning and design structures, such as private residences, office buildings, theaters, factories, and other structural property.
